ROCK, PAPER, SCISSORS VS COMPUTER
BRAIN BOOT STRATEGIES

CLASSROOM APPLICATION

"This activity kept my students engaged and focused the whole time!"

Recommendations

- Modify to include playing against the teacher or pair up students if technology isn't available.
- Use a separate stand alone slide or visual aid to show what exercises go with Win, Lose and Tie.
- Download your own copy of the slide deck and reorder the slides often so students don't memorize the order of the computer's moves.
- Remind students the goal is to be moving and the game is for fun to keep competitive players from getting off track.
