

CARD SHARKS

BRAIN BOOT STRATEGIES

CLASSROOM APPLICATION

"The kids all said this was their favorite of the entire year! They loved that they were able to guess the cards and were very invested. I liked this activity because it was easy to explain and implement!"

Recommendations

- Adapt the winning activity to something students are more willing to do, depending on student age/preferences.
- Apply concepts of thumbs up, down, or sideways to math concepts of greater than, less than, or equal to.
- For younger students, modify to use number cards (not playing cards); helps with number recognition and reinforcing concepts of greater than, less than, and equal to.
- Easy to modify to use with other types of math cards as well (money, time, multiplication).
