

ALASKA

BRAIN BOOT STRATEGIES

CLASSROOM APPLICATION

"My students were very excited to play a new game; they thought it was super fun!"

Recommendations

- Fun variation of a familiar game that required more thinking and concentration since it was not the traditional Rock, Paper, Scissors game.
- Challenge students to think of other animals and habitats (jungle, ocean, desert, etc.) or just other variations that students come up with on their own.
- Ties well with ecosystem/food chain lessons.
- This activity can be made into a bracket like March Madness brackets for basketball. Winners of each round move on and at the end crown an Alaska Champion.
